Certificate of Service Use

The Certificate of Service is designed to provide verification to the Registrar that the parentage information submitted on the Registration Application of the offspring is valid and can be verified by the signatures of all parties involved in the mating of the ewe. By signing and submitting this form, the parties involved are defining their contractual relationship regarding the production of offspring.

Therefore:

- This form is to be completed and signed by the owner (or lessee) of the ewe at the time of breeding and signed by the technician performing the procedure or by the owner of the ram being leased for service.
- If a ewe is sold as bred via an Artificial Insemination (AI) procedure or by live cover of a leased ram, please provide this completed form to the new owner at the time of transfer.
- This completed form must accompany any registration application when the conception was through an AI procedure or through the live cover use of a ram owned by a party other than the owner of the ewe.
